# DigiRoom®

Your digital meeting room

DigiRoom® - Your digital meeting room

DigiRoom is your meeting room for two participants at a distance. DigiRoom is the solution to the growing demand for secure video conferencing. Businesses and authorities are increasingly demanding video conferencing that can be integrated into their existing systems to make it easier for users.

It is also becoming increasingly important to protect the privacy of users and DigiRoom is therefore designed with security in mind.

Benefits of DigiRoom®

- **Efficient communication** - video, audio and file sharing in real time
- **Web-based** - all you need is a browser
- **Simple** - natural user interface
- **Secure** - all communication is encrypted
- **Platform independent** - works on iOS, Android, Mac OS, Windows 10

Integration

DigiRoom is designed to seamlessly and quickly integrate with other IT solutions that lack a digital meeting room. Well integrated IT solutions improve the user experience.

Technology

DigiRoom is a novel cloud service and is offered as Software as a Service. The video meeting supports video and audio of the highest quality. DigiRoom uses the latest protocols for calls. WebRTC.

Security

The communication in DigiRoom is secure. The participants in the meeting room use encrypted media and telephony protocols end to end.
